## Abstract of JP9062687

**PROBLEM TO BE SOLVED:** To acquire desired information without requiring any frequent complicated operation by a user and to reduce that information as desired by providing prescribed information from accepted information based on information acquisition conditions contained in a generated template and displaying that provided information.

**SOLUTION:** A template generating/changing part 202 generates the template having the information acquisition conditions showing the conditions for providing the desired information from the various information of images, sound and characters or the like. Based on the information acquisition conditions contained in the template generated by the template generating/changing part 202, an information data possessing part 201 acquires the prescribed information from the information accepted from information providing service organization. The information provided by the information data acquiring part 201 is displayed on a display device 107. Therefore, the user of information processor can always acquire the desired information from the information providing service organization by generating the template.
